PROFILE

Aspiring Software Engineer. Professional pursuing a degree in Computer Science. Excels people, problem-solving, listening skills, and very teachable willing to learn on the job. at communicating with

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems (BS)

New York, NY

SKILLS

December 2027

Programming Languages: Java, Python, PHP, JavaScript, HTML & CSS, Rust (Beginner)

Tools: Git, Spring, Spring Boot, RDB (PostgreSQL, MariaDB, MySQL), FastAPI, Linux, Ubuntu

Relevant Courses: DSA, Computer Networking, Computer Architecture, Web Computing

PROJECTS

September 2023 – Ongoing

Java Lightweight Web Server:

- Developed a lightweight HTTP server in Java from scratch with no frameworks. Implemented custom HTTP request parsing and static file serving to gain fundamental understanding of the HTTP protocol and server-client communication. Used raw socket programming to deepen understanding of multithreaded communication.

Multithreaded Chatroom:

- Engineered a concurrent, terminal-based chat server and client in Java using raw socket programming. Handles multiple users at a time and was a foundational project to learn about multithreaded programming and socket programming. Implemented multithreading to seamlessly manage multiple simultaneous user connections, prevent blocking I/O, and ensure real-time message broadcasting without data loss.

Other:

- Created a Terminal Weather App in Java that fetches data from an API and returns useful text needed from a user's requests in the CLI. This API handles incoming JSON payloads to and extracts data points from a user's request, then formatting the output into a clean user-friendly terminal display based on user entries.
- Developed a RESTful backend CRUD API using Java and Spring Boot to process, manage, and store personalized fitness and workout data. Allowed me to understand how to create robust endpoints for seamless data retrieval and manipulation, and modern backend architecture.

PROFESSIONAL EXPERIENCE

Finish Line/Macy's IT Tech Support – Technician / Customer Support (Part Time)

Jersey City, NJ

- Provided technical assistance for software, and network issues, resolving problems efficiently for end users.

June 2024 – June 2025

- Performed troubleshooting, device setup, system updates, and basic repairs.
- Assisted with maintaining computer equipment, printers, and other office technology to ensure smooth daily operations.
- Assisted customers with footwear selection, sizing, and product recommendations, providing a positive in-store experience. Processed sales transactions, returns, and exchanges accurately while maintaining strong product knowledge.

ACTIVITIES

Pace University Football Team: 3-Year Player

Dickinson High School Football & Track Team: Captain + 2 Year Varsity Starter, All Conference

September 2021 – Ongoing
